

Practical Test Answer Key

Amazon VA Interview Lab

Search Term Report Review

Promote: Terms with 2+ orders, ACoS at or below target, sufficient data

Pause: Terms with 15+ clicks, 0 orders, relevant but not converting

Negate: Irrelevant terms with high spend and no sales

Monitor: Terms with limited data that could go either way

ACoS/ROAS Calculations

$ACoS = (Ad\ Spend / Ad\ Sales) \times 100$

$ROAS = Ad\ Sales / Ad\ Spend$

Spend \$50, Sales \$200: ACoS = 25%, ROAS = 4x

Spend \$150, Sales \$300: ACoS = 50%, ROAS = 2x

Spend \$80, Sales \$800: ACoS = 10%, ROAS = 10x

CPC Ceiling Formula

$Max\ CPC = Price \times Target\ ACoS \times CVR$

Example: $\$29.99 \times 0.25 \times 0.10 = \0.75 max CPC

If current CPC > max CPC, reduce bids gradually

Campaign Launch Sequence

Phase 1: SP Auto Discovery + SP Exact Branded Defense

Phase 2: SP Product Targeting (Competitor ASINs)

Phase 3: SP Broad/Phrase + SKAG for proven terms

Phase 4: SB Branded + SD Retargeting

Phase 5: Seasonal and cross-sell campaigns
